

BC 93/018 Silicone Emulsion

Description

Basildon Chemicals BC 93/018 Silicone emulsion is designed for use in the manufacture of equine care products.

Product Features

Gives good gloss on hair.
Aids de-tangling of manes and tails.
It is a liquid and easily formulated.

Applications

BC 93/018 Silicone Emulsion can be used as the basis for horse care products such as mane and tail shine and general horse grooming products.

Method of Use

The emulsion is supplied as a concentrate and can be diluted for use in the final product. Emulsion levels of 5-10% in the final formulation can be used, depending upon the properties required.

This product should be re-homogenised via gentle stirring/agitation before use as slight 'creaming' can occur with long periods of standing.

Toxicity and Handling

BC 93/018 Silicone emulsion is basically non-hazardous with a very low order of toxicity, although prolonged contact with the skin or contact with the eyes may cause some irritation. See our material safety data sheet for more information.

Storage and Shelf Life

The product should be stored below 32°C and not allowed to freeze. Shelf life of the unopened container is 12 months from date of manufacture. If you wish to use the product after this time please contact us for approval.

Typical Properties

Percentage silicone	50
Colour	White, mobile emulsion
Specific gravity (25°C)	1.0

Technical Service

Our technical and sales staff have considerable experience of the use of silicone products in a very wide variety of industries and the benefit of this experience is freely available to all our customers.
